TRACINGS**

another of our modern **BLUEPRINTING** services

**Kodagraph Autopositive  
Paper and Film  
ARE PRODUCTS OF  
Eastman Kodak Company  
Rochester 4, N.Y.**

Perhaps some of your drawings had light lines to start with. Perhaps others have been worn down by repeated print-making and constant handling. Whatever the cause, such originals create a real problem whenever you try to obtain usable prints from them.

**A low-cost remedy** for this situation is to have us reproduce your weak-line tracings on Kodagraph Autopositive Paper or Film. It's really amazing how these high-contrast photographic materials can intensify original detail . . . render light pencil lines with ink-like density . . . increase print legibility!

**You'll find this service** of ours well worth the moderate cost in terms of errors avoided and money saved, in the shop or out on the job. Why not decide to assure print legibility by having Kodagraph intermediates made from all your "problem" drawings—from now on!
