

**IMAGINE...  
A CD MUSIC SYSTEM  
THAT ALSO LETS  
YOU SHARE YOUR  
PHOTOS & SLIDES  
ON YOUR TV!**

**THE NEW KODAK PHOTO CD SYSTEM**

## THE LATEST WAY TO SHARE YOUR FAVOURITE PHOTOS

Now you have the option of having your 35mm images converted into digital form and stored on a new type of Compact Disc, called a KODAK Photo CD. Then you can play your images back on your color TV, through a new type of CD player – producing beautiful color images, as big as your TV screen.

### Enjoy your memories – both new and old

Now you can view all your photographic images on *one* system. The KODAK Photo CD system enables you to store, retrieve and view both new and old 35mm images – off either color and black and white negatives and/or slides.

What's more, the new KODAK Photo CD players can also play music CD's too!

## CONTROL YOUR IMAGES AT THE TOUCH OF A FEW BUTTONS

The "TELE" function gives 2x blowups of part of the scene.

To help show off your pictures to best effect, KODAK Photo CD players incorporate a number of framing, enlargement and picture-rotation functions.

### On-screen enlargements

One of the most popular features is the enlargement function, which provides 2 times

blowups of selected areas – via a moveable frame line. When you push the "TELE" button, the framed image is enlarged to fill the screen.

All the photo facilities, *plus* the full range of music CD functions are easily controlled by a *single* remote unit.

The easy-to-use remote control can access any image on a Photo CD disc, plus control/play music CD's.

## IN EASY-TO-USE KODAK PHOTO CD PLAYERS

While KODAK Photo CD players look like standard CD music units, they provide *both* the photo capability and the latest "one-bit" sound reproduction technology.

They form a logical extension to existing home entertainment components.

Both models are full-function in design and provide the same image manipulation, sound, autoplay and custom sequencing features.

Both players easily connect to existing color TV\* and home entertainment systems.

KODAK Photo CD Player - model PCD 865.

The larger PCD 5865 model includes a five-disc carousel and on-screen control displays. This provides you with random access to around 500 photo images, or up to 5 hours of continuous music!

Top-of-the-line model PCD 5865.

\* Your TV requires an "antenna in" connection, otherwise an adaptor may be required.

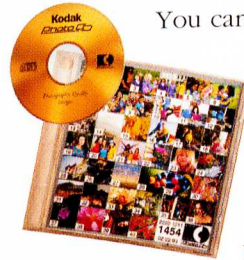

# 100\* PICTURES ON EACH KODAK PHOTO CD DISC

One of the key benefits of the KODAK Photo CD System is that it is able to integrate both new and old 35mm film images. As a result, no special cameras or film are required. You take your pictures and have your 35mm film developed in the normal way.

At this point, you have options of immediate transfer to Photo CD disc, or making a selection for later transfer from both new and old 35mm images (off negatives and/or slides).

\* Each KODAK Photo CD disc can store around 100 images (which could include up to 4 rolls of 35mm x 24 exposure film). They're returned in a storage case – together with a handy photo-index print and selection number for each frame.

# PHOTO CD TRANSFER SERVICES FROM KODAK

You can order Photo CD disc transfers through many of the outlets participating in the Kodak Express QMS Program, or photo dealers supplying Kodak Processing Services.

## Photo CD discs are easy to create

Select around one hundred 35mm slides and/or negatives and have them transferred all at *one time*, or select and transfer them *in batches* over time – to create individual discs of special occasions, holidays, children growing up, etc.

As Photo CD is a worldwide standard, you can give *duplicates* of parts of, or complete discs, to family and friends overseas (who have Photo CD-compatible players).

### More Information

- For general enquiries on the Photo CD system and applications, call the Kodak Information Centre on **008 333 194** or **(03) 353 2801**.
- For enquiries on transfer services, call Kodak Photo Services on **008 662 680**.
- For technical enquiries, call the Kodak Hotline on **008 333 043** or **(03) 353 2171**.
