GO FOR THE GOLD

KODAK Batteries...

The performance you need. The quality you expect.

KODAK SUPRALIFE™ Photo/Electronic Cells are a natural choice.

For over 100 years, Kodak has built its reputation on high-quality cameras, film and photographic products. Now you can trust Kodak for battery replacements for all your photographic equipment.

Protect your valuable photographic equipment—make quality KODAK Batteries your power source for still, movie and video cameras... flash units... exposure meters... and slide viewers.

KODAK SUPRALIFE Alkaline Batteries... quality-construction for high performance and long life.

Quality is a Kodak tradition. KODAK SUPRALIFE Alkaline Batteries are the only alkaline batteries with real gold contacts for superior corrosion resistance and excellent conductivity. Each SUPRALIFE Battery is double-sealed to prevent leakage. And they're available in the most popular sizes: 9-volt, AAA, AA, C and D.

KODAK ULTRALIFE™ Lithium Power Cells... a break-through in power cell technology.

Need to replace a 9-volt battery? Ask for the KODAK ULTRALIFE Lithium Power Cell. This little powerhouse lasts up to *twice as long* as current high-performance alkaline 9-volt batteries. They're gold-tipped for superior conductivity, too. For staying power that lasts, use KODAK ULTRALIFE Lithium Power Cells.
