### Metric Conversion of Kodak Products

During 1974 an increasing number of *Kodak* products will be converted to the metric system. This changeover is in accordance with Australia-wide programmes co-ordinated by the Metric Conversion Board.

In this price list, we have listed each product under the imperial or metric names which will be in most common use during 1974. However, further changes to metric sizes and measures will occur from time-to-time throughout the year.

All products now manufactured by KODAK (Australasia) PTY. LTD. which have imperial sizes also have the equivalent metric size printed on the package or container.

Metric Conversion Factors		
Linear	Fluid	
	Imperial Measure	U.S. Measure
1 inch – 25.4mm	1 fluid ounce – 28.412ml	1 fluid ounce – 29.573ml
1 foot – 30.48cm	1 pint (20 fl. oz.) – 568.24ml	1 pint (16 fl.oz.) – 473.18ml
1 yard – 91.44cm	1 gallon – 4.5461 litre	1 gallon – 3.7854 litre
1 chain – 20.1168m		
1 furlong – 201.168m		
1 mile – 1.852km
