

# KODAK Color Printer, Model 5S-5 KODAK Enlarging Color Printer, Models 8S-5 and 11S-5

Model 8S-5

Model 11S-5

## FLEXIBILITY

These high-speed colour printers are now better than ever. Each model is equipped with the new KODAK VCB Lamphouse Model S/BK, that provides three calibrated dichroic colour-balancing filters for precisely adjustable control of the light beam, and two cold mirrors for rapid changing from one film type to another.

Auxiliary timing units provide greater ease in changing paper emulsion or film types.

## ADAPTABILITY

The printer can be coupled with a KODAK Video Color Negative Analyzer, Model 2, which electronically generates a positive display, which when balanced, visually provides colour correction readings in order to

produce high-quality, low waste prints. The addition of the KODAK VCNA Tape Reader gives even more efficiency, and reduces the chance of operator error.

## VERSATILITY

Prints from negatives can be made on KODAK 'Ektacolor' Papers. Prints from transparencies can be made on KODAK 'Ektachrome' 14 RC Paper, by the addition of the KODAK 'Ektachrome' Paper Printing Kit, Model 8S.

## PRODUCTIVITY

- High speed, easy to operate, and low-cost production.
- Correct density and colour balance are maintained by the slope-control circuitry, when printing over-exposed or under-exposed negatives.

- Auxiliary timing units incorporating slope centre potentiometers can be pre-set to compensate for differences between paper emulsions or film types.
- Printers can be equipped with the KODAK VCNA Data Converter, Model S-2, and the KODAK VCNA Tape Reader to handle VCNA output data.
- The 5S-5 Printer produces prints from 9 × 13 cm (3½ × 5 in) to 13 × 18 cm (5 × 7 in)
  - 8S-5 Printer produces prints from 10 × 12 cm (4 × 5 in) to 20 × 25 cm (8 × 10 in)
  - 11S-5 Printer produces prints from 15 × 20 cm (6 × 8 in) to 27.9 × 35.6 cm (11 × 14 in)
 Paper advance is adjustable in 1.3 cm (½ inch) increments.
- Produces up to 1200 finished prints per day from a mixture of package and reprint orders.

## OPTIONAL PRINTER ACCESSORIES

### KODAK Digital Timer, Model 2

Measures the red, green and blue exposure times simultaneously from 0 to 0.999 second or from 0 to 9.99 seconds. This accurate timer can also total the times of successive exposures (up to 9.99 seconds), or it can be automatically re-set to 0 after each exposure.

### KODAK Print Marker, Model 5

Provides a graphite mark on the back of the paper during the printing operation.

### KODAK 'Ektachrome' Paper Printing Kit, Model 8S

Adapts either the Models 8S or 11S Printers for the production of colour enlargements from colour transparencies.

### KODAK VCNA Data Converter, Model S-2

Provides the accuracy of the VCNA, along with the high-speed efficiency of the KODAK Enlarging Color Printer, Models 8S-5, or 11S-5 and the KODAK Color Printer, Model 5S-5.

## KODAK VCNA Tape Reader

Provides a more efficient method for input of VCNA printing information input by means of a punched tape. It also reduces the risk of operator error.

## SPECIFICATIONS

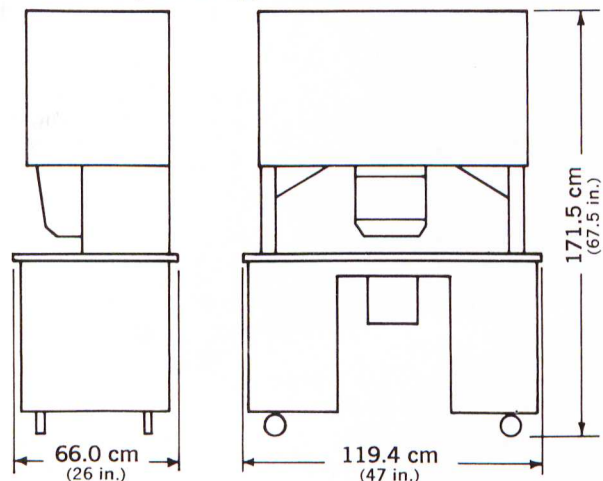

Model : 5S-5  
 Colour : Beige  
 Net weight : 272 kg (600 lb)

Model : 8S-5, 11S-5  
 Colour : Beige  
 Nett weight : 279 kg (615 lb)  
*All weights given are approximate*

Electrical requirements (5S-5, 8S-5 and 11S-5) :  
 110 to 125 volt a.c., 50-60 Hz ; 900 watts, 15 Amps.  
 Multi-tap transformer supplied separately.

## PRINTER DIMENSIONS

*Dimensions given are approximate*

*Because of our constant endeavour to improve quality and design, modifications may be made to products from time to time. Details of stock availability and specifications given in this publication are subject to change without notice.*
